One Child at a Time

Veronica Oriwa
Bachelor of Education Sciences
2009 to present

I was born in 1985. I was a third born in a family of seven. I grew as a hard working girl. I was obedient and respectful.

In 1991 I was taken to Kiowbursari D.O.V. Primary school and started my nursery school. I was very bright and continued to top right through nursery all the way to Standard 8. In 1998 I sat for my K.C.P.E. exams and became the top best student in my school and in the whole division. This is my memorable times because it is when I saw my parents love and that of the teachers. I received many gifts and congratulations for my intelligence.

On February 1991 I secured a place at Kereri Girls High School in Kisii where I joined Form One. I still continued to do well in my secondary education. Besides class work I loved various sports like athletics, football, netball, and swimming. My hobbies were reading, singing, watching movies, and teaching.

In the year 2002 I sat for my K.C.S.E. exams and emerged among the top girls who later secured a place in the university. I was very happy and also were my parents. They were proud of me. In 2004 I joined Kenyatta University to undertake my bachelor's degree in education sciences. Since my childhood I loved sciences this motivated me to take biology and chemistry as my favorites at the university.

While I was in the university and teaching being my favorite. I joined a compassionate high school where I was teaching biology and chemistry. Later I joined St. Mary High School where I was also given a responsibility as a boarding mistress.

In May 2009 I joined Clay International Secondary School in Makueni as a teacher of biology and chemistry. I love my job and the vicinity. My plans and ambitions are to make Clay a center of excellence and create a bright future for the young stars to enter into the market job with the best skills and commitments.
